Science Workshop – Science Week

Dear Parents and Guardians,

I am delighted to inform you that our school will be celebrating Science Week from Monday, 10th March through to Friday, 14th March 2025. This special event aims to inspire our students and foster their curiosity about the wonderful world of science.

As part of this exciting week, we are thrilled to announce a visit from the Spark2 Science Professors on Tuesday, 11th March. They will be conducting engaging workshops focused on the fascinating concepts of Change and Adaptation.

Your child will participate in a one-hour workshop during the school day on Tuesday. The sessions are designed to be interactive, educational, and fun, providing hands-on experience with scientific principles in an age-appropriate manner.

These workshops complement our curriculum and offer students a unique opportunity to explore scientific concepts with professional educators who specialise in making science accessible and enjoyable for young learners.

No special preparation is required for the day, but we encourage you to ask your child about their experience afterward to reinforce their learning.

If you have any questions about Science Week or the workshops, please do not hesitate to contact the school office.

Thank you for your continued support of your child's education.

Yours sincerely,

G Bailey
